ACADEMIC INTERESTS

My academic interests center around building secure, stable, and incentive-compatible decentralized systems, with an emphasis on permissionless blockchains and decentralized finance. The foundation of my research draws upon diverse disciplines, including information security, program analysis, measurement, machine learning, game theory, and finance.

EDUCATION

- Imperial College London** *London, United Kingdom*
PhD in Computer Science 2019 – Present
• Advisor: [Dr. Arthur Gervais](#).
- Imperial College London** *London, United Kingdom*
MSc in Communications and Signal Processing 2014 – 2015
(with distinction)
• Advisor: [Dr. Wei Dai](#).
- Southeast University** *Nanjing, China*
BE in Information Engineering 2010 – 2014
• GPA 87 (top 15%).
• Mitsubishi Electric Scholarship, Excellent Award in Innovation Practice, and numerous course scholarships.

RESEARCH EXPERIENCE

- University of California, Berkeley** 2022.05 – 2022.08
Visiting Researcher
• Host: Prof. Dawn Song
- Chainlink Labs** 2022.02 – 2022.05
Research Intern
• Working on order-fairness protocols.

TEACHING EXPERIENCE

- Cryptocurrencies** University College London
Guest Lecturer *Autumn '23*
- Introduction to Blockchains, Cryptocurrencies, and Smart contracts** Yale University
Guest Lecturer *Autumn '23*
- Decentralized Finance** MOOC by Stanford, UCL, UIUC, and UC Berkeley
Voluntary Teaching Assistant *Autumn '21, Autumn '22*
- Decentralized Finance** Imperial College London
Teaching Assistant *Spring '22*

PROJECTS

SwapSwap

<https://swapswap.org/>

SwapSwap is the first automated arbitrage market maker. Its mission is to promote the decentralized nature of blockchains. By automatically executing optimal routing and arbitrage while swapping crypto-assets, it can save up to an average of 90% on transaction fees. SwapSwap also helps mitigate miner extractable value competition and, as a result, strengthens blockchain consensus security.

Blockchain Workbench

<https://blockchainworkbench.com>

I design, implement, and maintain Blockchain Workbench, a blockchain online learning platform. This platform is designed to provide beginners with fundamental knowledge of blockchains and interactive solidity (the most popular language for developing smart contracts) programming exercises. Notably, Blockchain Workbench has been adopted as the primary solidity educational platform for blockchain and DeFi courses at prestigious institutions such as Imperial College London and ETH Zurich.
